

TJ Kyong (경태진)

Business Development Manager

I recently moved to Korea from San Francisco where I was employed to wear MANY hats. From company spokesman, biz dev, sales, tech support, to marketing... I had a foot in most operations of the company. I love technology and am amazed at what is available and at the speed of development. I am an avid learner and a quick one at that. I have an F4 Visa and am eligible to work.
